## Instructor Comments

**Describe the one best thing about the course or the instructor that was effective in helping you learn. If you could suggest one thing to improve the course, what would it be?**

- Professor was always available to help me during his office hours and after class and via e- mail and he recommended ways to help me improve my understanding of his class and he worked well with me taking my exams at the Moses Center. He was very helpful and I am grateful to him.
- Very challenging class but it made it all the more interesting. The handwritten slides were the best and most engaging methods. Thank you!
- encouraged participation. really passionate about class and material and genuinely wants to teach us everything he knows. Admit his mistakes when our counterarguments make sense. Really inspired us to learn and challenged us to dig into the material. Made the subject really fun and inspiring. One of the best classes I had here at nyu.
- The instructor was always well prepared for class and understood the material well. To improve the course I would try to make the midterms easier.

## Instructor Comments

**Describe the one best thing about the lab section or the instructor that was effective in helping you learn. If you could suggest one thing to improve the section, what would it be?**

- He was very nice and answered many questions for students. He was very helpful
- Dmitry explains material very well and puts in effort in recitation
- I think Dmitry was very available through email, which is good. Although, I think he could have improved on relating what we did in recitation back to what we were doing in class.
- N/A
- His class examples helped me completely understand the class material
- The lab helps me understand more about the materials and sometimes another way to think about the model/variables
- Not many people showed up but he was helpful even in small groups

Specific comments:

I think Dima did a good job <sup>being</sup> ~~presenting~~ a responsible TA of this difficult class.

I like his proof of Prof. Rubinstein's problems.

For Bisin's <sup>part</sup> ~~part~~, I think it would be better

if he can, in each TA session, presents the detailed

proof of Bisin's lectures. ~~That~~ That would be more

efficient. I think most of us are quite behind the course overall. Enjoy it.
